Engineer Advisory

Cases

Selected projects, with their scope, key decisions and our role in the work.

Engineer ApS was registered in 2025. These cases include company projects and work our founder carried out in client teams and as an employee, dating back to 2003. Each case explains the role and working arrangement.

One infrastructure plan for 14 departments

Designed a shared framework for a research institute that 14 departments could run on together, each keeping the things that make it different.

2025

Read the case study

A consistent identity across channels

Developed Engineer ApS branding across offline and online material, connecting its visual identity with the engineering work it presents.

2025

Read the case study

Brand communication informed by audience response

Used market research and audience feedback to shape Engineer ApS content and outreach.

Read the case study

A safety net that no longer costs half an hour

Cut the automated checks guarding every release from 27 minutes to 10, by running them in the right order and several at a time.

2026

Read the case study

These cases introduce selected engineering work in plain language. Each links to the full record: the situation, the contribution and the result. Use the examples to judge relevance to your project, then ask about the scope and supporting evidence.

Find a comparable business result

Compare delivered projects with the business problem you need to solve.
