Engineer Advisory

Guided company projects through development

Guided the execution of numerous company projects, offering expert support in the software development phases.

2015 – 2022

expert support through every phase of the build

Situation. There were a lot of projects running at the same time, each in the middle of its development phase, and they all needed steady technical guidance to stay on the rails. Left alone, projects drift — a wrong approach taken early gets expensive by the time anyone notices.

Task. Guiding that execution was the job — being the technical support the teams could lean on through the development phases.

Action. The work stayed hands-on across a lot of the company's projects at once. That meant unblocking people when they were stuck, looking hard at an approach before too much got built on top of it, and generally staying close enough to catch a project heading the wrong way while it was still a course correction and not a rebuild. The idea was to be available rather than a gate — to keep things moving, not to make everything wait on one person.

Result. Projects moved through their tricky development stages more smoothly with someone experienced to lean on at the right moments, and that steadied delivery right across the company's portfolio.

Bring this experience to your project

Use "Guided company projects through development" as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. Somebody on your side of the table when a supplier, a budget or an architecture decision needs a second informed opinion.

Need a steady hand across your projects?

Talk through your project with the engineer responsible for delivery. We agree the scope, price basis and handover in writing before work begins.

Role context: GIS Software Development Team Lead. It draws on Team Leadership, Technical Leadership, Mentoring & Coaching and Project Management. And while you are here, we are rather good at Technical Leadership & Consulting, Team Building & Mentoring and Project Management (Agile).
